Back Packs A Plenty

LAKE SAINT LOUIS, MO, – Medical Transportation Management, Inc. (MTM) once again teamed up with HealthCare USA to provide backpacks for low-income children in the St. Louis and Kansas City surrounding areas. MTM donated \$5,000 toward the purchase of the backpacks. HealthCare USA held seven back-to-school health fairs between the two cities over the summer months. Each child was presented with a backpack filled with school supplies. The health fair provided physicals along with dental, vision, hearing, and lead screenings for children. Adult services included mammograms, HIV testing, and lipid profiles. Social Services agencies were also on hand to provide relevant education and information to parents.

MTM and HealthCare USA have a long history together. Both companies began in 1995. HealthCare USA was MTM's first client. The two have teamed up to provide backpacks at back-to-school health fairs for several years. "It is a privilege to help the children of low-income families prepare for a great school year," said Alaina Maciá, President and CEO of MTM. "HealthCare USA does a phenomenal job of organizing and providing such comprehensive support to these families. We are proud to team up with them once again," Maciá added.

HealthCare USA Chief Operating Officer, Allen Spath said, "We truly appreciate

MTM's generosity and commitment to the children and families that we serve."

MTM provides industry-leading programs in non-emergency transportation management for more than 1.6 million people annually. The company operates health care access and assessment programs in 16 states and the District of Columbia via 25 contracts with state and county governments, Medicaid and Medicare managed care organizations (MCO), and health care providers. Founded in 1995, the company is a privately held woman-owned business enterprise.
